

We have all learned in recent months that taking care of ourselves and our own health also means taking care of the safety of other. To make it all easier for all of us, we follow these six procedures at Clubco:

1. we have increased the frequency of cleaning and disinfection of handles, elevator buttons and all touched surfaces in general
2. we disinfect common areas with the help of nanotechnology, which removes all viruses, bacteria and fungi
3. we placed dispensers with disinfection in the cowork premises
4. information leaflets are displayed everywhere, drawing attention to the need to wear respirators, keeping a safe distance and using the lift individually
5. we have trained the cleaning staff to use the correct cleaning methods and have informed all suppliers about prevention and compliance with hygiene regulations
6. we installed Pure Zone antimicrobial foil on all handles in the space, which kills and eliminates bacteria and coronaviruses with 99.9 % success

We will be happy if you follow all the hygiene recommendations with us.
